SUMMARY

GenAI engineer with 4+ years building production-style LLM applications and agentic systems in Python — RAG, multi-agent orchestration, embeddings/vector retrieval, and natural-language interfaces — on a strong backend, full-stack, and AWS foundation. Ships evaluable, guardrailed AI features end to end and optimizes for reliability and performance. AWS Certified; Oracle Certified Professional, Java SE 17.

TECHNICAL SKILLS

GenAI & LLMs: LLM APIs (OpenAI, Anthropic Claude, Gemini), prompt engineering, RAG, LLM fine-tuning, function/tool calling, structured outputs, local inference (Ollama), LangChain, LangGraph, PyTorch

Agents & Evaluation: AI agents, multi-agent orchestration, agentic workflows, tool use, evaluation & feedback loops, output guardrails, citations

Retrieval & Data: Embeddings, vector search (ChromaDB), semantic retrieval, PostgreSQL, SQL optimization, data processing

Backend & Full-Stack: Python, FastAPI, REST APIs, Node.js/Express, microservices, WebSockets; Java/Spring Boot; React, TypeScript

Cloud, MLOps & SDLC: AWS (Certified Cloud Practitioner), Docker, Git, Linux, CI/CD, monitoring/observability, code reviews, unit/regression testing, Agile/Scrum

AI Dev Tools & Languages: Cursor, Claude Code, Codex, Google Antigravity; Python, SQL, Java, JavaScript/TypeScript

EXPERIENCE

Python Developer — GenAI & Backend Engineering | Capgemini

Jul 2024 – May 2026

San Antonio, TX / Remote

- Built Python LLM applications and backend services, integrating LLM APIs (OpenAI, Claude) into classification and extraction workflows and cutting manual effort 35%.
- Designed reusable LLM integration patterns — prompt engineering, structured outputs, and output validation/guardrails — for consistent, reliable AI behavior.
- Improved performance 20% (query optimization, refactoring) and reliability (–15% recurring issues via validation, retries, structured logging).
- Drove root-cause analysis and code reviews, cutting critical issue-resolution time 75% (48h → 12h) and adding regression tests.
- Coached teammates and documented setup/demo flows, improving adoption and developer velocity.

Software Engineer — Observability Platform | New Relic

Jun 2020 – Dec 2022

Hyderabad, India

- Built Java/Spring Boot backend services for a large-scale distributed observability platform across microservices.
- Designed and optimized REST APIs, reducing inter-service latency ~15% and improving reliability under load.
- Tuned Hibernate ORM queries and data-access patterns to improve throughput and reliability under sustained production load.
- Automated data validation, log analysis, and regression testing in Python, reducing manual QA cycle time ~30%.

PROJECTS

AI Apps Portfolio — LLM Applications · Python, RAG, ChromaDB, Embeddings, Ollama · [GitHub](#)

- Built 5 LLM applications — chatbot, prompt-chaining, multi-document RAG with citations, guarded Text-to-SQL, and a YouTube summarizer — on a shared, provider-agnostic LLM abstraction layer.
- Implemented embeddings + ChromaDB vector retrieval, local inference (Ollama), and output guardrails for safe, evaluable results.

Agent Hub — Multi-Agent Orchestration Platform · Python, Claude, Codex, OpenAI, Gemini · [GitHub](#)

- Built a multi-agent platform where agents plan, generate artifacts, self-score, and iterate via git commit/reset — reusable agentic workflows with evaluation and feedback loops.
- Provider-agnostic across Claude, Codex, OpenAI, and Gemini with clean, auditable execution history.

Indian SME Engine — Full-Stack LLM Product · React/TypeScript, Python, PostgreSQL, WebSockets · [GitHub](#)

- Built an end-to-end multi-tenant LLM product — React/TypeScript dashboard, REST APIs, WebSockets, and an AI classification/scoring pipeline with an action queue.
- Engineered JWT auth, tenant data isolation, and validated reliability with 100+ backend/API tests.

EDUCATION & CERTIFICATIONS

M.S., Information Technology — Webster University, San Antonio, TX · Jan 2023 – May 2024 · GPA 3.6/4.0

B.Tech, Computer Science Engineering — GITAM (Deemed) University, Hyderabad, India · Jun 2016 – Jun 2020

Certifications: AWS Certified Cloud Practitioner · Oracle Certified Professional, Java SE 17 Developer
